

COMPRESSION CARRIER (MALE)

Constructed of a highly durable stretch material, the Compression Carrier moves like a second skin. The proprietary, Thoracic Ballistic Contour (TBC) design naturally represents the human form with soft ballistic panel edges to achieve optimum low signature. The Compression Carrier naturally flexes to the contours of the body for greater maneuverability and maximum concealability while the thermoregulating inner lining provides a cool, comfortable fit.

FEATURES:

- Proprietary, Thoracic Ballistic Contour (TBC) design
- Ergonomic shape naturally contours to the body
